Index to WEATHERWISE

Volumes 1–10, 1948–1957

All articles considered of lasting interest in the first ten volumes of WEATHERWISE are indexed according to author and subject. Titles are exactly as they appeared in the publication except where certain explanatory material has been added in parentheses to aid the reader. Each citation has the volume number in boldface followed by the page number. The table at the bottom of odd-numbered pages shows at a glance the relation between volume number and year.

Titles are listed alphabetically under authors. In cases of joint authorship, titles are listed under all authors. Book reviews are listed in the subject index under Book Reviews and under both author and reviewer; book titles are in italics.

In the subject index, articles are listed alphabetically by title except under Covers and Weather Summaries, where titles have been listed chronologically. An attempt has been made to cross-index articles under all applicable subject headings. Most subject headings are those used in *Meteorological Abstracts and Bibliography* published by the American Meteorological Society.

Published by WEATHERWISE for the
AMERICAN METEOROLOGICAL SOCIETY
3 Joy Street, Boston 8, Massachusetts

Career opportunities in the U. S. Weather Bureau, **6,** 119
Federal meteorologist examination, **1,** 133
Foreword (to Career and Education issue), **6,** 116
The private practice of meteorology, **6,** 124
Weather Bureau positions, **8,** 97
Climatic Change
A climatological bench-mark network, **9,** 88
Are New England winters getting milder?, **4,** 5
Temperature trends in New York City, **7,** 149
The Earth's changing climates, **10,** 54
Theories of climate change, **9,** 183
Climatological Data
A climatological bench-mark network, **9,** 88
The gold mine at Asheville, **6,** 33
Climatology
A climatological bench-mark network, **9,** 88
Guides to the location of weather records prior to 1870, **8,** 97
A high altitude solar research station, **9,** 155
Agricultural climatology at Seabrook Farms, **4,** 27
Another "wettest spot on earth," **2,** 113
Applied climatology at Seabrook Farms, **6,** 36
Are New England winters getting milder?, **4,** 5
Climatology applied by the Air Force, **6,** 51
Climatological extremes, **9,** 192; **10,** 60; **10,** 202
Frostproof and Frostburg—how did they get their names?, **2,** 130
Great Lakes weather, **6,** 3
Indian summer, **1,** 109
Notes on the climate of Indochina, **7,** 56
Prevailing tracks of lows and highs, **9,** 83; **9,** 128; **9,** 158; **9,** 205; **10,** 50; **10,** 85
Snow cover in Canada, **6,** 155
Temperature trends in New York City, **7,** 149
The Canadian Arctic, **9,** 61
The climate of Canada, **9,** 56
The father of American climatology, **10,** 92
The Mauna Loa observatory, **9,** 147
The Mt. Washington observatory, **9,** 151
The weather and climate of Korea, **3,** 80
The weather of Formosa, **8,** 39
The weather outlook for this year's eclipse (1954), **7,** 32
Volcanoes and world climate, **5,** 58
When spring arrives, **2,** 31
When summer commences, **2,** 55
When summer ends, **2,** 89
When winter begins, **2,** 129
Winter weather over Suez, **9,** 182
Clouds
Cirrus, **5,** 8
Cloud photography, **3,** 51
Cloud photography project, **6,** 72
Forecasting the duration of low clouds following cold front passages at Elkins, West Virginia, **4,** 62
Mammato-cumulus clouds, **2,** 74
Project Cirrus to end, **5,** 30

(1—1948, 2—49, 3—50, 4—51, 5—52, 6—53, 7—54, 8—55, 9—56, 10—1957)

The birth and death of a cumulus, **3,** 56
Wave-cloud formation at Denver, **7,** 34
Winter funnel clouds over Lake Champlain, **8,** 44
Cloud Nuclei
Sea-salt rainmakers, **3,** 67
Simple experiments in atmospheric physics, **8,** 68; **8,** 101; **8,** 118; **8,** 141
Cloud Physics
Simple experiments in atmospheric physics, **8,** 68; **8,** 101; **8,** 118; **8,** 141
Covers (arranged in chronological order)
(Pilot ballon observation in the Naval Reserve weather training program), **1,** 1
(Radiophoto of first meeting of the Little America Meteorological Society), **1,** 21
(Three P-61 night fighters silhouetted against a thunderhead), **1,** 45
(Hurricane lashes the coast of Florida near Miami), **1,** 69
(Meteorological tower at Brookhaven National Laboratory), **1,** 93
(Typical meteorological substation used in several western snow laboratories), **1,** 117
(Aboard USCG Cutter *Duane* in rough weather, taking a surface psychrometric observation), **2,** 1
(Aerial view at Warren, Arkansas along the path of tornado), **2,** 25
(Sailplane taking off in good soaring weather at Elmira, N. Y.), **2,** 49
(Striking example of mammato-cumulus clouds), **2,** 73
(Radar photograph of the hurricane in Florida on September 21, 1948), **2,** 97
(Ice storm damage at Bolivar, Missouri), **2,** 121
(Windslab avalanche), **3,** 1
(Rainmakers visit New York City's Esopus watershed in the Catskill Mountains), **3,** 25
(Interesting sky over the meteorology building at Brookhaven National Laboratory), **3,** 49
(Waterspout on the Adriatic Sea), **3,** 73
(Forest fires in San Bernardino National Forest, California), **3,** 97
(Digging out from one of the blizzards that struck Watertown, N. Y.), **3,** 121
(Top of cloud produced by atomic bomb explosion in the air over Bikini Atoll), **4,** 1
(Member of the Amateur Weathermen of America operates weather station at Seabrook, New Jersey), **4,** 25
(Hailstorm damage to a plane at Pueblo, Colorado, airport), **4,** 49
(B-29 landing following routine tracking of a hurricane), **4,** 73
(Vapor trails of Boeing B-17 Flying Fortress bombers over Bremen, Germany), **4,** 97
(Skyhook balloon begins its ascent), **4,** 121
(Aerial view of Mt. McKinley, Alaska), **5,** 1
(Automatic weather station under winter conditions on Mt. Washington, N. H.) **5,** 25
(Hailstones large as hen eggs fell on Columbia, South Carolina), **5,** 49
(Late spring in the Arctic, measuring snow depth), **5,** 73
(Delivering newspapers through the record-breaking snowfall at Denver), **5,** 97
(Team of Siberian huskies under winter conditions), **5,** 121
(Ore tankers in slush ice in Buffalo harbor), **6,** 1
(Applications of meteorology), **6,** 25
(Dust storm approaches Springfield, Colorado), **6,** 65
(Amateur radio operator transmits weather report to Hurricane Warning Service), **6,** 89
(Synoptic laboratory at The Pennsylvania State College), **6,** 113
(Great Plains Turbulence Project at O'Neill, Neb.), **6,** 153
(Jet stream weather chart), **7,** 1
(Hail damage to aircraft), **7,** 25
(Dr. Charles F. Brooks addresses District of Columbia Branch of AMS), **7,** 49
(A radiosonde flight takes off), **7,** 77
(Miss Anne Slattery, pioneer in meteorological education), **7,** 109
(Federal-State Cooperative Snow Surveys members weigh a snow sample), **7,** 145
(Display of books on weather by Enoch Pratt Free Library, Baltimore), **8,** 37
(Hurricane Carol scene, Wollaston Beach, near Boston, Mass.), **8,** 61
(Hurricane warnings displayed at Cape Fear River, N. C., during Hurricane Hazel), **8,** 85
(Artist's visualization of an earth satellite circling the earth), **8,** 109
(Cinemascope weather board used on WKY-TV, Oklahoma City, Okla.), **8,** 133
(Five presidents of the AMS), **9,** 73
(B-50 over National Hurricane Research Project headquarters), **9,** 109
(Mt. Washington Observatory after ice storm of January 1956), **9,** 145
(Street scene during Washington's greatest snowstorm), **9,** 181
(Connecticut State Highway engineers examine rain gage), **10,** 37
(Hon. Harry S. Truman and AMS members), **10,** 73
(Cloud resulting from first thermonuclear explosion), **10,** 109
(Control room at du Pont's Chambers Works during severe weather situation), **10,** 145
(Winter scene at Monticello near Charlottesville, Virginia), **10,** 181
Drought
A simple index of drought conditions, **7,** 64
Drought—1955, **9,** 14
Drought and agriculture, **7,** 51
Drought and dust on the Plains, **6,** 67
Drought in the Southwest, **4,** 19
Drought in 1956, **10,** 22
Drought—October 1947, **1,** 16
Runs of dry months, **4,** 94
The drought-flood story of the spring of 1948, **1,** 76
The early summer drought of 1952, **5,** 111
The Northwest dry spell of June 1949, **2,** 90
The 1954 drought, **8,** 22
Dust Storms
Drought and dust on the Plains, **6,** 67

Eclipses
A high altitude solar research station, **9**, 155
Annular eclipse weather, **4**, 111
Eclipse weather broadcasts, **4**, 74
The annular eclipse of September 1st (1951), **4**, 84

Floods
Flood disaster in Kansas, **4**, 79
Floods of 1954, **8**, 18
Hurricane rains cause devastating floods, **8**, 124
Major floods of 1955, **9**, 16
Rainmaker's flood?, **4**, 90
Red River flood, **3**, 63
The amazing Mr. Buzz, **2**, 115
The Chicago deluge of 9–11 October 1954, **7**, 160
The greatest flood of history, **4**, 110

Fog
Artificially induced fog engulfs Denver airport, **4**, 67
Climatological extremes—2, **10**, 60
Ice fog and aircraft operations, **4**, 128
Simple experiments in atmospheric physics—7, **9**, 195

Forecasting
A forecast survey by Amateur Weathermen, **1**, 118
A statistical study of drainage winds at Denver, Colorado, **4**, 115
A survey of the fallout forecasting program in the United States, **10**, 111
An objective method for forecasting minimum temperatures at New York City, **4**, 42
Dynamical prediction—the rational approach to weather forecasting, **8**, 145
East Coast storms, **1**, 36
Extended forecasts, **5**, 21
Forecasting for the offshore oil boom, **2**, 6
Forecasting the duration of low clouds following cold front passages at Elkins, West Virginia, **4**, 62
Forecasting the weather—The Santa Ana, **5**, 66
Industrial forecasting, **3**, 60
New aviation forecast service, **5**, 13
New forecast center, **5**, 82
Operations research looks at weather forecasting, **10**, 149
Predicting cold waves, **1**, 17
Private opinion, **1**, 59
Public opinion, **1**, 25
Remarks on long range weather forecasting, **1**, 23
Statement on weather forecasting, **10**, 110
The relationship of temperature and precipitation over the United States to the circulation aloft, **3**, 16; **3**, 40; **3**, 65; **3**, 89; **3**, 113; **3**, 138
The substation observer and flood forecasting, **2**, 104
The Weather Bureau's fire-weather service, **3**, 99
Thunderstorm today?—try a probability forecast, **2**, 61
Weather forecasting in transition—a survey and outlook, **10**, 119
Weather types of North America, **2**, 15; **2**, 40; **2**, 64; **2**, 86; **2**, 110; **2**, 136
Tornado forecasting study, **4**, 61

Freezes
Florida freezes, **7**, 7

Frost
Favorable spring frost conditions in the Middle Atlantic states, **5**, 38
Frost control with air circulators, **1**, 105
Frost prevention by radiant energy, **1**, 99
Frostproof and Frostburg—how did they get their names?, **2**, 130

Hail
A remarkable December hailstorm (1950), **4**, 58
Aircraft encounters with severe hailstorms, **7**, 27
Climatological extremes—2, **10**, 60
Hailstones and hailstorms, **5**, 51
Operation Hailstone, **6**, 160
The hailstorm problem, **4**, 50

Halos
A rare halo spectacle seen in Iowa, **5**, 69
Halos, **4**, 80

Historical Weather Records
The "first" systematic American weather observations, **8**, 116

Humidity
Low humidity in New Mexico, **4**, 114
Low humidities in the Southwest, **5**, 31

Hurricanes
A comparison of six great Florida hurricanes, **8**, 64
A preliminary hurricane report from Florida, **1**, 94
An improved hurricane warning service, **9**, 110
Boxing the hurricane, **2**, 84
Climatological extremes—2, **10**, 60
Communications, **8**, 77
Dropsonde to be used to study eyes of hurricanes, **2**, 85
Du Pont tide and storm warning service, **10**, 164
Early hurricanes of 1951, **4**, 105
El Cordonazo—The Lash of St. Francis, **5**, 99
Fifty years of hurricanes, **6**, 91
Finding and tracking the hurricane, **1**, 73
Fluctuations in frequency of tropical storms, **10**, 121
Heat and hurricanes mark the fall (1954), **7**, 164
Hiki—Hawaii's first hurricane of record, **3**, 127
Hunting hurricanes with the seismograph, **2**, 80
Huracan—Evil spirit of the tropics, **1**, 71
Hurricane alert in the Bahamas, **3**, 86
Hurricane Janet at Swan Island: A personal encounter, **9**, 121
Hurricane rains cause devastating floods, **8**, 124
Hurricane watchers, **10**, 118
Hurricanes and tropical storms 1887–1956, **10**, 132
Hurricanes entering U. S. mainland—Eastport to Hatteras 1635–1955, **9**, 125
Hurricanes entering U. S. mainland—Hatteras to Brownsville 1896–1954, **8**, 72
H. R. 5260 doomed?, **8**, 77
H. R. 5260 "The Hurricane Bill," **8**, 63
If a hurricane strikes, **1**, 70
In the eye of a hurricane, **3**, 122
May hurricanes, **4**, 67
Open season on hurricanes, **3**, 108
Operation of the National Hurricane Research Project, **9**, 111
Studying hurricanes from the inside, **1**, 84

(1—1948, 2—49, 3—50, 4—51, 5—52, 6—53, 7—54, 8—55, 9—56, 10—1957)

The distribution of peak wind gusts in Hurricane Hazel 1954, **8,** 92
The Florida hurricane of October 17–18, 1950, **3,** 136
The hurricane problem, **8,** 62
The hurricane season commences, **1,** 106
The late August hurricane (1949), **2,** 98
The Middle Atlantic Coast hurricane of 22–24 October 1878, **10,** 126
The movement of hurricanes, **4,** 102
The origin and detection of hurricanes, **4,** 75
The three most severe hurricanes of record, **9,** 126
The 1954 hurricane season, **8,** 12
The 1955 hurricane season, **9,** 11
Those ladies again!, **8,** 77
Weather amateur reporting network, **6,** 95

Hydrology
The hydrologic services of the Weather Bureau, **2,** 105
The role of the atmosphere in the hydrologic cycle, **2,** 99

Ice
Great Lakes season opens early (1952), **5,** 30
Ice reporting on the Great Lakes, **6,** 7
The famous Susquehanna ice bridge of 1852, **7,** 156

Ice Storms
Climatological extremes—2, **10,** 60
Ice damage to trees, **2,** 134
The great ice-storm, 8–13 January 1956, **9,** 162
The great southern glaze storm of 1951, **5,** 10
The ice storm—A winter menace, **2,** 123
Weather wisdom and the telephone, **2,** 131

Industrial Meteorology
Forecasting for the offshore oil boom, **2,** 6
Meteorology in a chemical industry, **6,** 34
Meteorology in a public utility, **6,** 49
National Association of Industrial Meteorologists, **6,** 62
Steel, **6,** 53
The new science of industrial meteorology, **6,** 29
The United States Weather Bureau and industry, **6,** 31
Weather and oil, **6,** 39

Instruments
A recent meteorological rocket, **1,** 52
A tornado model and the fire whirlwind, **8,** 88
An easily constructed remote temperature-indicating device, **5,** 93
Automatic weather stations, **5,** 26
Balloon altitude record, **2,** 2
Comparison between standard and small-orifice raingages, **9,** 94
Earth satellites: What will they mean to meteorology?, **8,** 121
Fog in the laboratory, **2,** 92
How to construct a barograph, **3,** 20
How to construct a density channel, **1,** 87
How to construct a glass-tube rain gage, **3,** 44
How to construct a mercurial barometer, **1,** 136
How to construct a minature tornado, **3,** 117
How to construct a motor-driven psychrometer, **3,** 93
How to construct a nephoscope, **3,** 70
How to construct a practical rain gage, **1,** 42
How to construct a psychrometer and fan, **2,** 21
How to construct a rain and snow shield, **2,** 142
How to construct a simple electrometer, **2,** 68
How to construct a simple wind-direction recorder, **4,** 70
How to construct a telethermoscope, **4,** 93
How to construct a wind vane, **1,** 66
How to construct an "airways" instrument shelter, **1,** 15
How to construct an anemometer, **2,** 44
How to construct an ombroscope, **2,** 118
Instrument congress and exposition, Philadelphia, Pa., 13 Sept. 1954, **7,** 78
Meteorological instrumentation at the National Bureau of Standards, **7,** 86
Meteorological instruments (Meteorological Service of Canada), **9,** 68
New Air Force weather equipment, **7,** 82
New research rocket, **2,** 88
Operation Moby Dick, **4,** 123
Radar as a meteorological instrument, **10,** 76
Radioactive snow gage, **5,** 127
Satellite television for meteorology, **10,** 183
Simple experiments in atmospheric physics—1, **8,** 48
Simplified all-weather remote psychrometer, **9,** 52
The amazing Mr. Buzz, **2,** 115
The Navy's automatic weather stations, **7,** 89
The transosonde, **7,** 79
Transatlantic weather balloon, **3,** 64
Weather Bureau improvements in meteorological instrumentation, **7,** 96

International Geophysical Year 1957–58
The USNC-IGY Antarctic program, **8,** 135

Jet Stream
A southerly jet stream marks the early fall (1957), **10,** 206
Jet stream research in the Navy, **7,** 3
Jet streams and aircraft operations, **4,** 99

Lakes
Great Lakes season opens early, **5,** 30

Land and Sea Breezes
Boston's east wind, **7,** 60

Letters
A letter from Korea, **6,** 11
(Lightning), **5,** 74
(Minimum temperature of −69.7° of 20 January 1954, Rogers Pass, Mont.), **7,** 26
(Tornado at Dyersburg, Tenn. 1952), **5,** 74
Tornadoes at Texarkana, **5,** 98

Lightning
Climatological extremes—2, **10,** 60
(Lightning), **5,** 74
Lightning conductor, **5,** 84
Lightning danger, **3,** 116
Lightning flash!, **1,** 56

Medical Meteorology
Heat and death rates, **5,** 82
Meteorology and preventive medicine, **6,** 47
The hay fever season in New York City, **3,** 79

Meteorological Films
Educational films in meteorology, **7,** 131

Meteorology in Canada
A short history of the Meteorological Service of Canada, **9,** 40

An introduction—, **9,** 39
Basic weather services, **9,** 42
Canada and the WMO, **9,** 53
Climatological services, **9,** 58
Forecasting for domestic aviation, **9,** 54
Meteorological communications, **9,** 47
Meteorological instruments, **9,** 68
Public weather services, **9,** 45
Research and training, **9,** 49
The Canadian Arctic, **9,** 61
The climate of Canada, **9,** 56
Trans-oceanic aviation services, **9,** 51

Methods of Computation
The wet bulb without tables, **2,** 92

Methods of Observation
A recent meteorological rocket, **1,** 52
Earth satellites: What will they mean to meteorology?, **8,** 121
Hunting hurricanes with the seismograph, **2,** 80
New Air Force weather equipment, **7,** 82
New *Circular "N"* edition, **4,** 69
Radar as a meteorological instrument, **10,** 76
Satellite television for meteorology, **10,** 183
The Navy's automatic weather stations, **7,** 89
The substation observer and flood forecasting, **2,** 104
The transosonde, **7,** 79
Weather by starlight, **1,** 32

Microclimatology
Comfortable living depends on microclimate, **3,** 7

Micrometeorology
Micrometeorology at Brookhaven, **1,** 95
The temperature at your feet, **2,** 75

Military Meteorology
Air Weather Service support to the Korean effort, **4,** 60
The weather of Formosa, **8,** 39
Weather support for the atomic tests, **8,** 111

Mountain Meteorology
Mount McKinley weather experiences, **5,** 3
Science and meteorology on Alaska's highest mountain, **5,** 2
The Mauna Loa observatory, **9,** 147
The Mt. Washington observatory, **9,** 151
The museum of the atmosphere, **10,** 193

Naval Aerology
Armed Forces active duty weather reserve projects, **1,** 6
Captain Minter heads Naval Aerology, **3,** 98
Naval reserve billets, **1,** 59
With the reserves, **3,** 15

Numerical Weather Prediction
Dynamical prediction—the rational approach to weather forecasting, **8,** 145
Organization and operation of the Joint Numerical Weather Prediction Unit, **9,** 75

Observatories
A high altitude solar research station, **9,** 155
The Mauna Loa observatory, **9,** 147
The Mt. Washington observatory, **9,** 151
The Duneland Observatory, **5,** 136
The museum of the atmosphere, **10,** 193

Observational Networks
A climatological bench-mark network, **9,** 88
An improved hurricane warning service, **9,** 110
Satellite television for meteorology, **10,** 183
The Connecticut State Highway meteorological network, **10,** 39
Weather amateur reporting network, **6,** 95
Weather stations in the Far North, **5,** 75

Observers Manuals
New *Circular "N"* edition, **4,** 69
New observers instructions, **6,** 22

Oceanography
Forecasting for the offshore oil boom, **2,** 6
Operation Cabot, **3,** 82
Skijump Operations, **5,** 83
Weather and oil, **6,** 39

Office of Naval Research
The support of meteorology by the Office of Naval Research, **5,** 108

Personalities
Antarctic weathermen, **3,** 15
Captain Minter heads Naval Aerology, **3,** 98
Dr. Brooks "Retires," **7,** 50
General Senter heads Air Weather Service, **3,** 98
Honorary degree (Ivan R. Tannehill), **8,** 106
Long Island weathermen, **3,** 87
Petterssen at Washington, **1,** 133
Professional weathermen serve TV, **10,** 162
Sam the weatherman (Samuel K. Pearson), **8,** 47
The father of American climatology (Lorin Blodget), **10,** 92
The story of Crazy Dockett (King of the Weather Men), **8,** 87
Weather general (Joseph J. George), **2,** 142

Phenology
Migrant birds are weatherwise!, **4,** 34
Time to fish for trout, **6,** 15

Publications
A selected bibliography in meteorology, **6,** 144; **7,** 128
Amateur Weatherman's Almanac, **5,** 50
Books for the amateur meteorologist during IGY 1957–58, **10,** 47; **10,** 95
Compendium of Meteorology, **5,** 22
Flight Information Manual, **2,** 37
Guides to the location of weather records prior to 1870, **8,** 97
Meteorological periodicals in English, **6,** 147
More about meteorological books—1954–56, **9,** 98
New books received, **8,** 154
New *Circular "N"* edition, **4,** 69
New *Weekly Weather and Crop Bulletin*, **7,** 163
Pilot's Weather Handbook, **8,** 57
Recent books on meteorology, **8,** 50
Recent specialized meteorological books (1952–54), **8,** 74
Weather Bureau publications, **7,** 124

Radar Propagation
Radar range varies with the weather, **5,** 17

Radar Storm Detection
A note on the successful identification and tracking of a tornado by radar, **9,** 198

(1—1948, 2—49, 3—50, 4—51, 5—52, 6—53, 7—54, 8—55, 9—56, 10—1957)

Eighteen months of storm avoidance with airborne radar, **10,** 189
Highlights of United Air Lines weather radar evaluation, **7,** 92
Hurricane detection by radar, **1,** 78
Radar (1955) **8,** 77
Radar as a meteorological instrument, **10,** 76
Radar detection of tornadoes, **7,** 31
Radar goes agricultural, **1,** 112
Radar tracks on Illinois tornado, **6,** 76
Radar tracks rainstorms for radio, **4,** 40
Simple radar scope photography, **7,** 38
Storm composites by radar, **3,** 107
Texas radar net, **7,** 31

Rainfall
Another "wettest spot on earth," **2,** 113
Arizona's two-season rainfall pattern, **6,** 96
Climatological extremes, **9,** 192
Heaviest rains, **5,** 54
Heavy rainfall at Galveston Island—June 3–4, 1950, **3,** 85
Once-in-a-hundred-year rainstorm Washington, D. C., 4 September 1939, **10,** 128
The Chicago deluge of 9–11 October 1954, **7,** 160
Northwest storms, **3,** 128

Rivers
The famous Susquehanna ice bridge of 1852, **7,** 156
The Yukon River breakup of 1952, **5,** 88

Sea Ice
A flight in search of ice islands, **5,** 78

Snow
Continuous snow, **4,** 9
Eastern snow conference (Albany, N. Y., 12 Feb. 1953), **6,** 14
Eastern snow conference (Hanover, N. H., 9 Feb. 1956), **8,** 134
Snow conferences (1955), **7,** 155
Snow surveying in the western mountains, **7,** 147
Snowfalls—Paul Bunyan style, **4,** 124
Snowflakes as question marks, **9,** 165
Summer snow, **4,** 92
Types of solid precipitation in snow storms, **1,** 124

Snow Cover
California's white gold, **1,** 119
Climatological extremes, **9,** 192
Record snowcover, **1,** 28
Snow cover in Canada, **6,** 155
Snow eaters of the high plains, **5,** 32
Snow rollers—nature at play, **2,** 12
Snow surveying in the western mountains, **7,** 147
Snowfall at Denver, **5,** 104
Snowfall notes for winter 1954–55, **9,** 22
Snowfalls—Paul Bunyan style, **4,** 124
The big winter of 1951–52 in the High Sierra, **6,** 12
The meteorology of avalanches, **3,** 3; **3,** 35
Topsy-turvy winter, **3,** 2

Snow Crystals
How to make snow crystal imprints, **1,** 7
Simple experiments in atmospheric physics, **10,** 44
The preparation of snow crystal replicas, **9,** 132
Types of solid precipitation in snowstorms, **1,** 124

Snow Storms
A record June snow storm at Calgary, Alberta (1951), **4,** 91
Great snows of the Great Lakes, **3,** 123
Heavy snowfalls at Calumet, Michigan, **4,** 126
It's hard to believe, **1,** 131
New York's snowburst December 26, 1947, **1,** 5
November storms, **2,** 141
Philadelphia's greatest snowstorm—December 25–26, 1909, **4,** 134
September snowstorm, **2,** 109
Snowfalls—Paul Bunyan style, **4,** 124
Some notable snows of the winter 1955–56, **10,** 26
The early November snowstorm of 1953, **7,** 13
The famous storm of November 1913, **2,** 126
The great storm of November 1950, **4,** 10
The "Knickerbocker" snowstorm of January 1922 at Washington, D. C., **9,** 188
The snow season of 1953–54, **8,** 25
The Washington and Jefferson snowstorm, **10,** 187
The 1950 November storm, **4,** 114
Topsy-turvy winter, **3,** 2
Why did it snow at Boston in April? (1953), **6,** 78
Winter strikes early in 1951, **4,** 131

Teaching of Meteorology
A camp weather station, **7,** 121
A meteorology course in Phoenix Union High School, **7,** 116
A weather course in Malden High School, **7,** 114
Air Force post-graduate weather training, **3,** 110
Air Force training program, **4,** 41
Florida State graduate courses, **4,** 19
Foreword (to Career and Education issue), **6,** 116
Laboratory of climatology, **6,** 150
Malden High School weather bureau, **1,** 8
Meteorological education in the United States. Facilities at twenty leading universities, **6,** 126
Meteorology in New Mexico, **2,** 37
Meteorology in our secondary schools, **7,** 111
Opportunities in meteorology—a general outlook, **7,** 118
Opportunities in Naval Aerology, **3,** 111
Preparing for college training in meteorology, **7,** 123
Texas meteorology degree, **3,** 86
The AMS and education, **7,** 110
USWB correspondence courses from Penn State, **4,** 142
Weather activity in the nation's schools, **7,** 125
Weather correspondence course, **1,** 135
Weather in elementary and junior high school programs, **7,** 120
What is meteorology?, **7,** 112
With the reserves, **3,** 15

Temperature
An objective method for forecasting minimum temperatures at New York City, **4,** 42
Hot weather in Texas, **4,** 106
June in January, **1,** 15
Midwinter temperature antics in the Black Hills, **1,** 126
Temperature trends in New York City, **7,** 149
The effect of natural shading on temperature measurements, **5,** 16
The temperature at your feet, **2,** 75
When spring arrives, **2,** 31
When summer commences, **2,** 55
When summer ends, **2,** 89
When winter begins, **3,** 2

Temperature Extremes
Climatological extremes, **9,** 192; **10,** 202
Coldest area in the United States, **7,** 152
Coldest temperatures in the United States, **4,** 136
Heat blast, **2,** 78
Hottest October (1950), **3,** 142
Lowest temperatures in the Northern Hemisphere, **2,** 10
(Minimum temperature of −69.7° of 20 January 1954, Rogers Pass, Mont.), **7,** 26
Notes on the 10 lowest U. S. temperatures, **4,** 138
Record low temperatures, **1,** 125
Severe freeze in Arizona, **3,** 31
That summer of 1816, **1,** 54
The Barrens of Pennsylvania, **1,** 102
The early March cold (1948) **1,** 38
The famous Susquehanna ice bridge of 1852, **7,** 157
The 1948–49 winter, **2,** 38
Three exceptional cities, **1,** 41
Top temperature in the United States, **1,** 77

Thunderstorms
Anti-lightning seeding, **3,** 59
Climatological extremes, **9,** 192; **10,** 60
Eighteen hundred thunderstorms, **2,** 139
Hot thunderstorm, **4,** 117
New York thunderstorm, **5,** 87
Probing the thunderstorm, **1,** 47
Thunderstorm today?—try a probability forecast, **2,** 61
Thunderstorms, **1,** 61
Thunderstorm survey, **4,** 65
Weather Bureau solicits data on severe storms, **7,** 41

Tornadoes
A fire-whirlwind of tornadic violence, **5,** 59
A note on the successful identification and tracking of a tornado by radar, **9,** 198
A tornado model and the fire whirlwind, **8,** 88
An airplane flight over a tornado path, **2,** 34
Climatological extremes—2, **10,** 60
Dallas tornado 2 April 1957, **10,** 90
Inside a Texas tornado, **4,** 54
Jacksonville tornado, **9,** 80
Progress in the study of tornadoes during 1954, **8,** 20
Radar detection of tornadoes, **7,** 31
Radar tracks an Illinois tornado, **6,** 76
Some observations on the tornado at Blackwell, Okla. 25 May 1955, **9,** 97
Spring tornadoes and the tornado warning service, **5,** 31
Statement on detection, tracking and warning of tornadoes, **10,** 178
The Denver tornado of May 21, 1952, **5,** 106
The Easter tornadoes at Bermuda, **6,** 74
The Hennepin County tornado of July 20, 1951, **5,** 60
The nature of tornadoes, **2,** 27
The tornado and severe storm project, **4,** 51
The tornado cyclone, **2,** 32
The tornado research airplane, **10,** 82
The tornado story of 1948, **1,** 55
(Tornado at Dyersburg, Tenn. 1952), **5,** 74
Tornado forecasting study, **4,** 61
Tornado tragedies of 1953, **6,** 100
Tornadoes and tornado research in 1956, **10,** 14
Tornadoes at Texarkana (1952), **5,** 98
Tornadoes during 1955, **9,** 18
Tornadoes of 1954, **8,** 21
Weather Bureau solicits data on severe storms, **7,** 41

Turbulence
NACA studies at Brookhaven, **3,** 50
The Great Plains turbulence field program, **6,** 166
Weather and atmospheric pollution, **3,** 103

Upper Air Soundings
A recent meteorological rocket, **1,** 52
Balloon altitude record, **2,** 2
Balloonistics in the Pacific, **2,** 83
New research rocket, **2,** 88
The humidity at 100,000 feet!, **3,** 10
The transosonde, **7,** 79
Transatlantic weather balloon, **3,** 64

Visibility
A phenomenal haze in the Pacific (1950), **3,** 83
Artificially induced fog engulfs Denver airport, **4,** 67
Oil vapor causes smog, **4,** 69
The great smoke pall—September 24–30, 1950, **3,** 129

Waterspouts
Some phases of waterspout behavior, **3,** 75
Waterspout over Boca Chica, **2,** 135

Weather Broadcasts
Anti-weatherwise, **3,** 92
Communications, **8,** 77
Eclipse weather bradcasts (1954), **7,** 40
Minneapolis weather ball, **3,** 10
Scoutorama weather broadcasts, **3,** 64
Stamford weather central, **4,** 20
Telecasting the weather, **5,** 14
Weather flags, **2,** 35
Weathervision, **10,** 42

Weather Bureau
Career opportunities in the United States Weather Bureau, **6,** 119
New Weather Bureau advisory group meets, **6,** 90
Report of the Advisory Committee on Weather Services, **7,** 17
The hydrologic services of the Weather Bureau, **2,** 105
The substation observer and flood forecasting, **2,** 104
The United States Weather Bureau and industry, **6,** 31
The Weather Bureau's fire-weather service, **3,** 99
USWB correspondence courses from Penn State, **4,** 142
USWB services separated, **4,** 135
Weather Bureau appropriations (1956), **8,** 97
Weather Bureau improvements in meteorological instrumentation, **7,** 96
Weather Bureau positions, **8,** 97
Weather Bureau solicits data on severe storms, **7,** 41

(1—1948, 2—49, 3—50, 4—51, 5—52, 6—53, 7—54, 8—55, 9—56, 10—1957)

Weather Control
Advisory committee on weather control, **7,** 11
Connecticut weather control, **4,** 16
Statement on weather modification, **10,** 74
The effect of atomic bomb explosions on weather, **4,** 3
The weather control bill, **4,** 17
Weather modification, **6,** 84
Weather Maps
The daily weather map, **1,** 83
Weather Ships
Ocean weather ships, **6,** 154
Weather patrol, **2,** 3
Weather ships, **7,** 40
Weather Summaries (arranged in chronological order)
Weather and the San Francisco fire of 1906, **9,** 90
The drought-flood story of the spring of 1948, **1,** 76
This winters' unusual weather and circulation (1948–49), **2,** 36
The 1948–49 winter, **2,** 38
November storms (1949), **2,** 141
Topsy-turvy winter (1949–50), **3,** 2
This winter's weather and circulation (1949–50), **3,** 38
Northwest storms (1950), **3,** 128
The weather and circulation of the winter of 1950–51, **4,** 38
Hot weather in Texas (1951), **4,** 106
Low humidity in New Mexico (1951), **4,** 114
Winter strikes early in 1951, **4,** 131
Low humidities in the Southwest (1951), **5,** 31
December, 1951, brings winter and summer, **5,** 18
Floods and tornadoes mark early spring (1952), **5,** 63
May rains and June heat (1952), **5,** 90
The early summer drought of 1952, **5,** 111
Dog days of 1952, **5,** 114
Winter starts on a mild note (1952–53), **6,** 12
A mild winter across the nation (1952–53), **6,** 54
A late spring follows a mild winter (1953), **6,** 8
The abnormalities of spring make big news (1953), **6,** 108
The summer droughts (1953), **6,** 148
The end of the prolonged drought—? (1953), **6,** 172
Pacific air dominates the early winter (1953–54), **7,** 20
A warm winter brings record low temperature (1953–54), **7,** 42
The vagaries of spring 1954, **7,** 70
Spring's thermal capriciousness (1954), **7,** 104
Summer 1954—heat and hurricanes, **7,** 134
Heat and hurricanes mark the fall (1954), **7,** 164
The meteorological year of 1954, **8,** 3
Westerly flow controls the early winter (1954–55), **8,** 28
A varied winter—1954–55, **8,** 54
Spring 1955—Hot and cold, wet and dry, **8,** 80
Late spring favors the farmers (1955), **8,** 104
An active meteorological summer (1955), **8,** 128
Autumnal heat and hurricanes (1955), **8,** 150
The weather and general circulation of 1955, **9,** 5
Weather strikes early in 1955–56, **9,** 32
An interesting mid-winter—1955–56, **9,** 64
Snowy northeast—droughty southwest (1956), **9,** 102
A favorable crop season (1956), **9,** 136
A summer of persistence (1956), **9,** 172
Drought, then some relief, **9,** 210
The circulation and weather of 1956, **10,** 9
Early winter turns on the heat—drought persists (1956), **10,** 30
Winter 1956 brings record cold to the northwest and a very mild season to the south, **10,** 62
A turbulent spring season (1957), **10,** 98
Tornadoes mark May, and a hurricane visits in June (1957), **10,** 134
Northeastern drought and southeastern hot spell feature an otherwise average summer (1957), **10,** 170
A southerly jet stream marks the early fall (1957), **10,** 206
Weather Types
Weather types of North America, **2,** 15; **2,** 40; **2,** 64; **2,** 86; **2,** 110; **2,** 136
Whirlwinds
A fire-whirlwind of tornadic violence, **5,** 59
A tornado model and the fire whirlwind, **8,** 88
Wind
A statistical study of drainage winds at Denver, Colorado, **4,** 115
Boston's east wind, **7,** 60
Climatological extremes, **9,** 192; **10,** 60
Forecasting the weather—The Santa Ana, **5,** 66
Jet streams and aircraft operations, **4,** 99
March or otherwise, **1,** 30
November storms, **2,** 141
Operation Moby Dick, **4,** 123
Reports of the Great Plains windstorm—May 5–6, 1950, **3,** 62
The Columbia Gorge wind funnel, **6,** 104
The distribution of peak gusts in Hurricane Hazel 1954, **8,** 92
The famous storm of November 1913, **2,** 126
The Midwest windstorm of October 9–10, 1949, **4,** 107
The Tower of the Winds, **4,** 112
The 1950 November storm, **4,** 114

(1—1948, 2—49, 3—50, 4—51, 5—52, 6—53, 7—54, 8—55, 9—56, 10—1957)
